

Non-Stick Surfaces

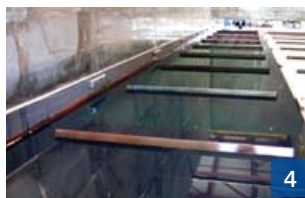

MetaLine Repair and Coating Systems

Receptacles Containers

Sprayable elastomeric coatings for thin or thick linings of sensitive storage and transport containers. Impact-resistant, reduces noise development, protects against sticking and solves corrosion problems

- Boxes (Type „Schäfer“)
- IBC containers
- Compost containers
- Shipping trays
- Chemical containers
- Magazine containers

- 1 *The elastomeric skin is crack and deformation-resistant*
- 2 *Seamless elastic surfaces optimize cleaning*
- 3 *Reduces impact forces and their noise development*
- 4 *Protects surfaces when storing bio-waste*
- 5 *Maximum corrosion protection even during direct exposure to salt*
- 6 *MetaLine liquid rubber coatings adhere to many materials*
