

Investment Protection

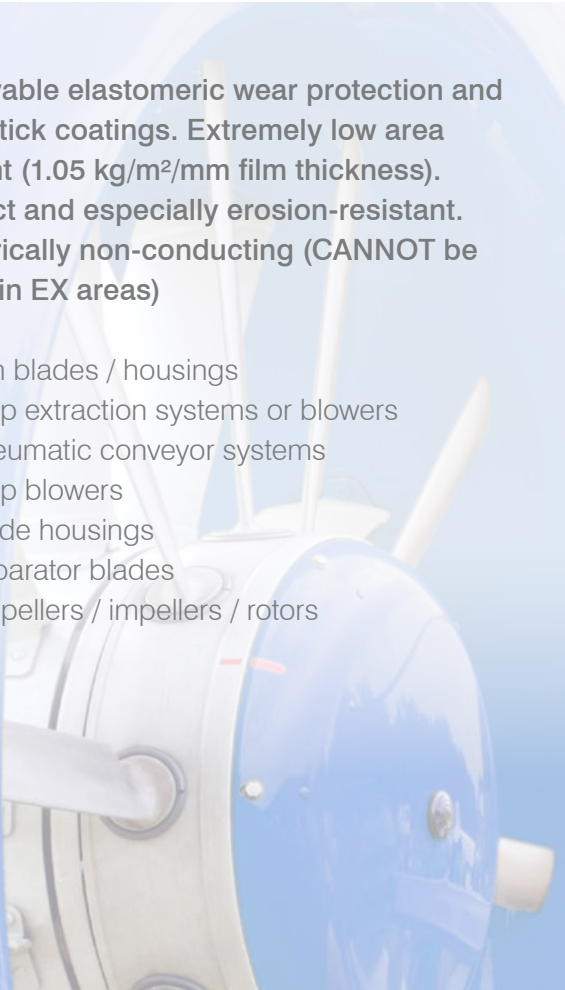

MetaLine Repair and Coating Systems

Fans Blowers

Sprayable elastomeric wear protection and anti-stick coatings. Extremely low area weight (1.05 kg/m²/mm film thickness). Impact and especially erosion-resistant. Electrically non-conducting (CANNOT be used in EX areas)

- Fan blades / housings
- Chip extraction systems or blowers
- Pneumatic conveyor systems
- Chip blowers
- Blade housings
- Separator blades
- Propellers / impellers / rotors

- 1 Fan blade with wear-resistant non-stick coating
- 2 Low area weights are an absolute must for rotors
- 3 MetaLine coatings are multifunctional and long-lasting
- 4 Seamless, rubber-like and especially impact-resistant - MetaLine 795
- 5 No risk of distortion - cold-sprayed elastomeric layer
- 6 Variable in hardness, static friction, thickness, color and structure
