

MetaLine® Series 500

Professional coat-it-yourself technology

Suitable for oily parts!

Seamless sprayable

Easy to apply

Abrasion resistant

For pharmaceutical use

Improves feeding rates

Protects feeding parts

Preserves bowl geometrie

Noise reducing

Oil resistant

Repairable / overcoatable

In every thickness

Anti-Static (optional)

60, 80, 90, 98 Shore A

For self-application

Sprayable, abrasion-resistant polyurethane-coatings for bowl feeders, vibration-trays, hoppers, gripping devices, elevating equipment and chutes

A very well-known material in a brand-new form of application: **Polyurethane** cold applied with conventional spray equipment. Quickly optimize feeding processes - as individually as your parts to be fed.

- *different hardnesses*
- *every thickness*
- *every colour*
- *different grades of roughness*

Pharmaceutical approval according to FDA standards (CFC 177.1680)

Noise reduction

fight noise already in its origin - instead of encapsulating it at high costs. Variable thicknesses allow noise reductions up to 20 dB(A).

Abrasion protection

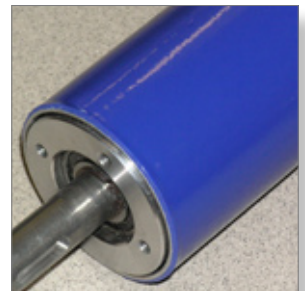

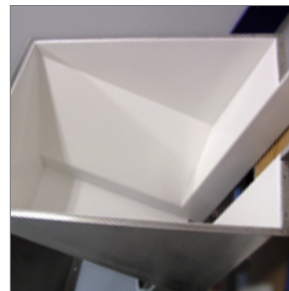

resists scratching, impacting and other forms of mechanical abuse. Can be used on steel, stainless steel, alumina, polyamide, fibre-reinforced plastic, alloys and others.

Increased performance

supports the fast transport, even of slightly oily parts. Cushions high impact. Applicable from smooth to rough in every desired grade.

Surface protection

protects sensitive feeding parts from being scratched or marked. Individually adaptable in colour to suit even pharmaceutical feeding demands.
